COMPLETING YOUR SURVEILLANCE SOLUTION

VIDEOINSIGHT®

VIDEO INSIGHT, PANASONIC'S POWERFUL ENTERPRISE VMS WITH COST EFFICIENCY

Video Insight is the latest in surveillance technology integrating powerful enterprise VMS features, and cost efficiency in one robust system.

With more than 25,000 current deployment worldwide in law enforcement, commercial, education, healthcare and transportation industries, Video Insight continues to provide you optimal solutions to meet your security demands.

Panasonic Video Insight meets your demand for an advanced Video Management System with a powerful complete configuration of enterprise-level reliability, and cost-efficiency as an easy-to-use surveillance solution.

Advanced surveillance features eliminate uncertainty and improves response times. Every feature provides direct user benefits to your surveillance operations.

ENTERPRISE VMS

Optimised Hardware Allows Unlimited Scalability

Engineered as a pure 64-bit system, Video Insight maximises hardware capability resulting in increased efficiency across all system features.

A key factor in hardware optimisation is Video Insight's powerful capability to allow users up to 400 cameras per server with an unlimited number of web clients and storage size.

This potentially provides users with unlimited scaling possibilities in the surveillance workflow.

### Advanced Bundled VMS Features

Video Insight features a single-management interface which comes pre-installed with a wide array of features at no additional costs. Enhanced surveillance features include the Video Wall V6, Automated Failover, Active Directory LDAP, Access Control Integration and Software Development Kit (SDK).

The advanced Guard Tour feature ensures operators perform scheduled security checks at stipulated times and the Rules function provides automated functions to reduce operators' workload.

COST EFFICIENCY

Surveillance is not cable TV, why pay for every channel you watch?

Lower cost than any other VMS

With the high cost commonly associated with VMS systems, Panasonic Video Insight seeks to eliminate unnecessary costs by introducing bundled VMS features and camera licenses in one complete system.

You can now access a full range of surveillance technology at no hidden costs.

EASY-TO-USE

Easy Integration With Your Hardware

Video Insight is engineered on an open architecture, providing support for over 4100 camera models from over 150 camera manufacturers.

An open platform not only provides easy integration with your surveillance workflow, but also encourages a hassle-free migration without extensive training and instruction.

Easy Operation with User-friendly Interface

Designed as a multi-viewer platform, the Video Insight grants users the ability to monitor cameras remotely on various operating systems including platforms such as, Windows, Mac, Web browsers, iOS and Android.
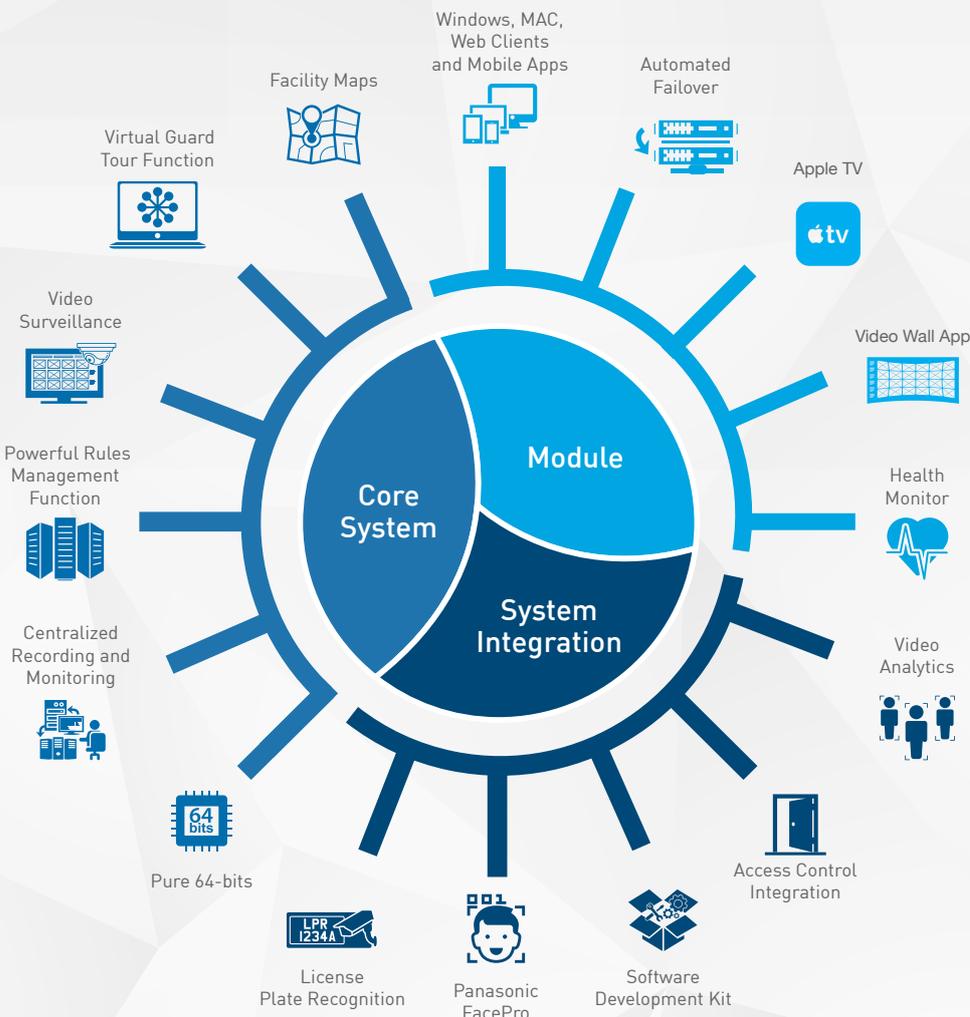

The integrated user-friendly graphics user interface makes it easy for users to operate intuitively and efficiently.

SURVEILLANCE TECHNOLOGY NEVER STOPS ADVANCING

Panasonic Video Insight is a robust enterprise-class surveillance system built with the principles of efficiency and simplicity of operation in mind.

With a strong commitment to the security industry, Video Insight brings together powerful surveillance technology, advanced features, unmatched flexibility, easy-to-use interface and a low total cost of ownership all in one single bundled system.

Be ready for the future of surveillance.

VIDEO INSIGHT BUNDLED SERVER

▶ Efficient 64-bit design supports up to 400 cameras/server (depending on recording condition)

▶ Designed for large camera deployments – multi-server, multi-location

▶ Open platform allows easy integration

▶ SQL Server based

▶ Supports camera- and server-side motion detection

▶ Automated Failover

▶ Integrates with Active Directory users and groups

▶ Support for local, direct attached, SAN / NAS
